

THE FUTURE OF FINANCE FUNCTIONS

Automation in Finance

Who am I? !!

Chris Tredwell

Cloud Accounting
Software

What is automation in finance?

*“The meaning of automation in finance and accounting is **the use of business process automation software to reduce repetitive manual administration tasks**, such as invoice automation, bank reconciliation, preparing financial reports, credit control and expense management from employee workloads”*

Key to evolution from **Transactional** **Analytical**

Let's face it ... no one trained for years so they could spend all day entering sales invoices into a finance system !

Cloud Accounting
Software

Why automate?

- Compliance
- Reduce costs
- Save time
- Reduce errors
- Improve consistency
- Strengthen data quality

*“An EY study found that **80 percent of finance-related tasks benefit from automation**, higher than all of the other sectors in the study because they’re rules based. Compare that to learning and development functions, where automation can improve only 12 percent of tasks.”*

(Accenture & Deloitte share that belief)

How much time do you spend on tasks that add value and contribute to company growth?

AQi//A

Cloud Accounting
Software

Before you get started....

- Processes
- People
- What's the value add? ... 'The Why?'
- The rest of the business
- Your team
- Your other systems
- Speak with incumbents / specialists

Considerations

- Quick wins
- What does best practice look like
- Don't get lost focusing on Buzz words
- Once you've implemented then integrate
- Communication
- Staff ... training / repurposed role
- Loss of control in finance
- Does the work need to be done within your team?
- Adapt processes to best practice not to suit new tech
- Stage of growth journey
- What does the future look like?
- Continuous improvement
- Track benefits and report them

Cloud Accounting
Software

Areas to automate ...

(Information going in - processing information - information coming out)

- Core bookkeeping (not on excel!)
- Movement of data
- Empower other departments
- Invoicing & Accounts Receivable
- Accounts Payable
- Period/Year end Close
- Compliance
- Report Generation
- Payroll
- Inventory Management
- Fixed Asset Management
- Treasury
- Expense management

Cloud Accounting
Software

Types of Automation

- Workflows
- Integration (*Plug ins / Excel Add ins / API / Zapier*)
- Artificial Intelligence
- Machine Learning
- Robotic Process Automation
- Optical Character Recognition
- Real-Time Data
- Smart Search / Reference Data / Rules and Permissions
- Unified Ledgers
- Bank Integration (*Open banking*)
